Ricardo Mateus
Rogério Amoêda
Manuel Correia Guedes
Contents

Part 1

Foreword
Luis Bragança, Manuel Pinheiro, Sadid Jalebi, Ricardo Mateus,
Rogério Amoêda and Manuel Correia Guedes

Welcome

Chapter 1. Actions and Policies to Implement Sustainable Construction

Energy Ratings Based on Measured Energy Consumption: A Practical Approach
for Implementation of EPBD and Identification of High-Energy Use Buildings
P. Hernandez, P. Kenny and R. Cohen

Achieving Sustainable Infrastructure in Washington DC
M. Cederroth

Sustainability Recommendations for a Social Housing Project: Barreiros,
Vitória (BR)
M. Rissoli, J.L. Calmon and K. Caser

Sustainable Housing: From Consensual Guidelines to Broader Challenges
J. Mourão and J. Branco Pedro

The Impacts of Residential Buildings – How to Identify Life Cycle Based
Improvement Potentials
B. Wittstock, C. Makish, A. Braune, J. Kreßig, N. Gallon and C. Wettel

The Contribution of the National Laboratory of Civil Engineering (LNEC) to
a Sustainable Built Environment
C. Pina Santos, J. Branco Pedro and J. Vasconcelos Paiva

Energy Efficiency of Old and New Buildings in Romania
D. Dar, V. Stoian, T. Nagy-Gyorgy and C. Dănescu

Construction Sites Environment Management: Establishing Measures to
Mitigate the Noise and Waste Impact
J.P. Couto and A.M. Couto

How to Attract Consumers and Real Estate Agents to Sustainable Housing
A. van Hal

Promoting the Environmental Management Systems into Construction Industry:
The First Step
J. Selh

Chapter 2. Sustainable Management of Existing Building Stock

A Framework to Sustainable Renewal of Existing Building Stock in Brazil
M.A.S. González and A.P. Kern

Sustainability and Natural Resources Uses at a South Brazilian University:
Proposing an Environmental Plan to University of Passo Fundo
M.A. Leite Frandoloso, E. Grada da Canha, L. Brandt,
F. de Brito Rodrigues, J.A. Rostrolda, L. Turella, L. de Negri and
T. Marchiori

The Service Integrated Envelope Applied for Sustainable Office Refurbishment
T. Eberik and U. Knaack

Characterization of the Lisbon Elementary Public School Building Stock
S. Raposo, M. Fonseca and J. de Brito

Overcoming the Barriers to Improving the Sustainability of Existing Commercial
Office Buildings
J.B. Storey

Sustainable Management of Existing Building Stock: A Strategy to Reduce
the Energy Consumption and the Environmental Impact
E. Mata, F. López and A. Cuchi

Housing and Information Society: Integration of ICT in the Existing Housing
Stock
S. Eloy, J. Plácido and J.P. Duarte

Chapter 3. Building Sustainability Assessment Tools

Early Design Stage Evaluation Tool for Sustainable Energy Systems in Large
New Buildings
K. Shanks

The Use of EPDs in Building Assessment – Towards the Complete Picture
A. Braune, J. Kreißig and K. Schödlauer

Some Observation About the Efficiency of Building Sustainability Assessment
Tools
C. Monterotti and A. Cuchi
Vitória's Healthcare Buildings Environmental Performance Based on LEED/NC 2.2 ................................. 310
J.S. Araújo and J.L. Calmon

Assisting the Commissioning of the Low-Energy Buildings Design: From a Methodology to a Dynamic Tool ................................. 318
N. Hummachi-Belkadi, M. Jardon, F. Gaúna and Y. Diab

Selecting Aspects and Indicators in Environmental Assessment Methods for Buildings ................................. 326
T. Malmqvist and M. Glanemann

Life Cycle Assessment Tool for Building Assemblies ................................. 334
J. Carmody, W. Trusty, J. Meil and M. Lucul

Performance Assessment for Sustainable Construction: Lest We Forget About the Client ................................. 341
W. Gyasi-Agyei, F.J. Schienblin and E.L.C. van Egmond

Urban Bioclimatic Indicators for Urban Planners with the Software Tool SILENE ................................. 348
F. Mignet and D. Groeleau

Perspectives of Building Sustainability Assessment ................................. 356
L. Bragaça, R. Matsens and H. Koukkari

Life Cycle Assessment of Construction Processes ................................. 366
J. Šešilh and A.C.M. Sousa

Optimization of Variable Selection for Sustainable Construction ................................. 373
S. Pushkar, A. Katz and R. Becker

Sustainability Assessment of Building Refurbishing Operations ................................. 381
L. Bragaça and R. Mateus

The Portuguese LiderA System – From Assessment to Sustainable Management? ................................. 389
M.D. Pinheiro

Life Cycle Assessment of Steel and Reinforced Concrete Structures: A New Analysis Tool ................................. 397
A. Peyroze, M. Silva and S. Jalali

Constant or Variable Indoor Environments? Sustainable Option of Adaptive Thermal Comfort ................................. 403
L. Matias, C. Santos, M. Rebelo, D. Silva and M. Correia Guedes

Developing a Method to Characterize Indoor Environmental Parameters in Naturally Ventilated Classrooms ................................. 411
N. Mahyveldin and H.B. Awhi

Towards an Integrated Decision Process of Sustainable Urban Projects ................................. 418
L. Adolphie and B. Rousval

Application of the EcoBlock method to Eco-Design – Electric Hand Dryers Versus Paper Towels ................................. 426
J. Joanes de Melo, L. Macedo and A. Galvão

Life Cycle Costing as Part of Decision Making – Use of Building Information Models ................................. 433
G. Krigsvoll

A Fuzzy-Neural Tree Knowledge Model for the Assessment of Building’s Transformation ................................. 441
S. Djurminovic and O. Ciftcioglu

Chapter 4. Design for Sustainability

Splitting and Managing the Solar Spectrum for Energy Efficiency and Daylighting ................................. 451
A.Y. Pelegreti, D. Harrison and J. Shackleton

A Sustainable Technical System for Ventilated Façades ................................. 459
J. Avellaneda, J.M. Gonzalez, A. Carbouiel and D. Lopez

Architectural Beam of Light Use of Daylight Pipes in Climates of High Latitude ................................. 466
A. Perez, R. Serva and A. Isilgune

Examination of Solar Control of Existing Building Stock in Izmir and Suggestions for a Sustainable Future ................................. 475
M. Albir

Energy Consumption of RC Buildings During Their Life Cycle ................................. 480
O. Bozdağ and M. Seçer

Poly-Optimal Method of Designing Environmentally Friendly Buildings ................................. 488
R.R. Gajewski, A. Weglarz and K.H. Zmijewski

Natural Lighting in Office Buildings – Energy Saving Potencial in Electrical Lighting ................................. 494
A.D. Coelho

Gypsum Plasters for Energy Conservation ................................. 502
N. Silva, J. Aguiar, L. Bragomco, T. Freire and I. Carado

Implementing the Low Energy Concept into Current Irish Housing Building Delivery Processes – Issues and Barriers ................................. 508
I. Kondratenko, V. Brophy and P. Hernandez

Service Life Prediction for Buildings’ Design to Plan a Sustainable Building Maintenance ................................. 515
B. Daniotti and S. Lupica Spagnolo

Durability Design of Metal Structures Based on Lifetime Safety Factor Method ................................. 522
L. Casini, F. Portiel and R. Landolfi

The Redesign for Residual Service Life of Existing Structures ................................. 530
A. Kudysz, P. Bulota and O. Lukosevičiene

The Flexible and Upgradable Façade Concept for Refurbishment ................................. 538
T. Ebbert and U. Knack

Performance Based Design Using Life Cycle Cost Analysis ................................. 546
M. Seçer and O. Bozdağ
Part 2

Foreword v
Luis Bragança, Manuel Pinheiro, Said Jalali, Ricardo Matias, Rogério Amoêda and Manuel Correia Guedes

Welcome vii

Chapter 5. Designing the Sustainable City of Tomorrow and Urban Sustainability
Environmental Performance and Management of Sustainable Urban Projects 637
E.D. Dufasnes, E.W. Wurtz, G.A. Achard and C.B. Buhk

Chapter 6. Sustainable Resources, Eco-Materials and Technologies
Energy and Resources, Material Choice and Recycling Potential in Low Energy Buildings 759
C. Thornmark
Sustainable Building Structures for Housing
D. Dubina, F. Ungureanu and M. Mutiu

Sustainability of Constructions. Van Abbe museum, Eindhoven
Y.K. Akughi

Sustainability of Constructions. Suleyman’s Mosque, Istanbul

Case Study: LEED™ by Design in the School of the Future
J. Kliwinski

Influence of End-of-Life Scenarios on the Environmental Performance of a
Low-Rise Residential Dwelling
H. Giervasto and L. Simões da Silva

The SHE Project: Sustainable Housing in Europe. Social Housing Coops’ Best
Practices for Sustainable Communities
A. Luzardi and A. Braccioni

Natural Illumination Availability in Ponte Da Pedra Apartment Block –
A Case Study
C. Cardoso, M. Abemeida and L. Bragança

Author Index

Jee – Janela ëco-Eficiente (Eco Efficient Window); Development of a High
Performance Standard Window
M. Verissimo, M.G. de Abemeida and L. Bragança

A Research on the Integrated System for Efficient Management of
Construction Site

Recycling Prefabricated Concrete Components – A Contribution to Sustainable
Construction
C. Asam

Guidelines for a Good Practices Manual on Sustainable Construction
J. Santos, L. Sanches and J. Teixeira

Sustainability in Lightweight Modular Construction for Housing
G. Wadi, J. Avellanedo and A. Cuchi

Chapter 9. Case Studies

East London Line Sustainability Initiatives
L.B. Core

The First Cooperative Building of Sustainable Housing in Portugal
J.P.T. Coimbra

Directing Sustainable Investments in Commercial Real Estate
A.G. Entrop and H.J.H. Brummers

Life Cycle Assessment of a Tourism Resort with Renewable Materials and
Traditional Construction Techniques
H. König, E. Schmidberger and L. de Cristofaro

A Sustainable Planning Design Tool for the Environmental Compatibility of the
Tourist Coastal Territory
A. Serafini

Building Deconstruction in Portugal: A Case Study
A. Santos and J. de Brito

Impacts in the Internal Environment Quality of a Music School from the Urban
Design of a University Campus
I.S. Castro, M.C.G. Silva, P.A. Rheingantz, L.E. Bustos and E. Diniz

Reducing CO2: Are Industrialised Construction Systems Better?
A. Pagés O. Paris and A. Cuchi

Integration of Sustainability Solutions in Sanitary Installations: The Example of the AveiroJOMUS “House of the Future”
R. Castro and A. Silva-Afonso

Certifying a Sustainable Reconstruction of Vernacular Architecture in
Peneda-Gerês National Park
M.I. Calval
