Agenda

1. Introduction and Background
2. OA evolution in Portugal
3. RCAAP project – Recent work and current situation
4. Future work

Context: Portuguese Scientifc System

- The Portuguese scientific and research system was small and underdeveloped until the end of the 20th century. This situation has been changing mainly in the last 10 years.

- On the last decade the number of researchers and scientific output (number of journal articles referenced on ISI) has been growing at an annual rate bigger than 10%;

- The number of Portuguese articles referenced annually by ISI was **lower than 1.000 until 1990**, become **bigger than 5.000 only on 2003** and **is currently near 8.500**.

Context: Portuguese Scientifc System

- The growth of the portuguese scientific output on the last decade was one of the biggest in Europe.

- This was the result of a national effort (growth of investment in science) but also of the previous level of scientific output.

Evolution of Open Access in Portugal

- The early developments of Open Access in Portugal were mainly driven by Universities, with several initiatives to promote the visibility and access to their scientific output;

- The first initiatives were lead by Minho University, with the creation of its institutional repository RepositóriUM, publicly released in November 2003, the definition (December 2004) and implementation (January 2005) of a pioneering institutional self-archiving policy and the organization of the 1st Open Access Conference (May 2005);
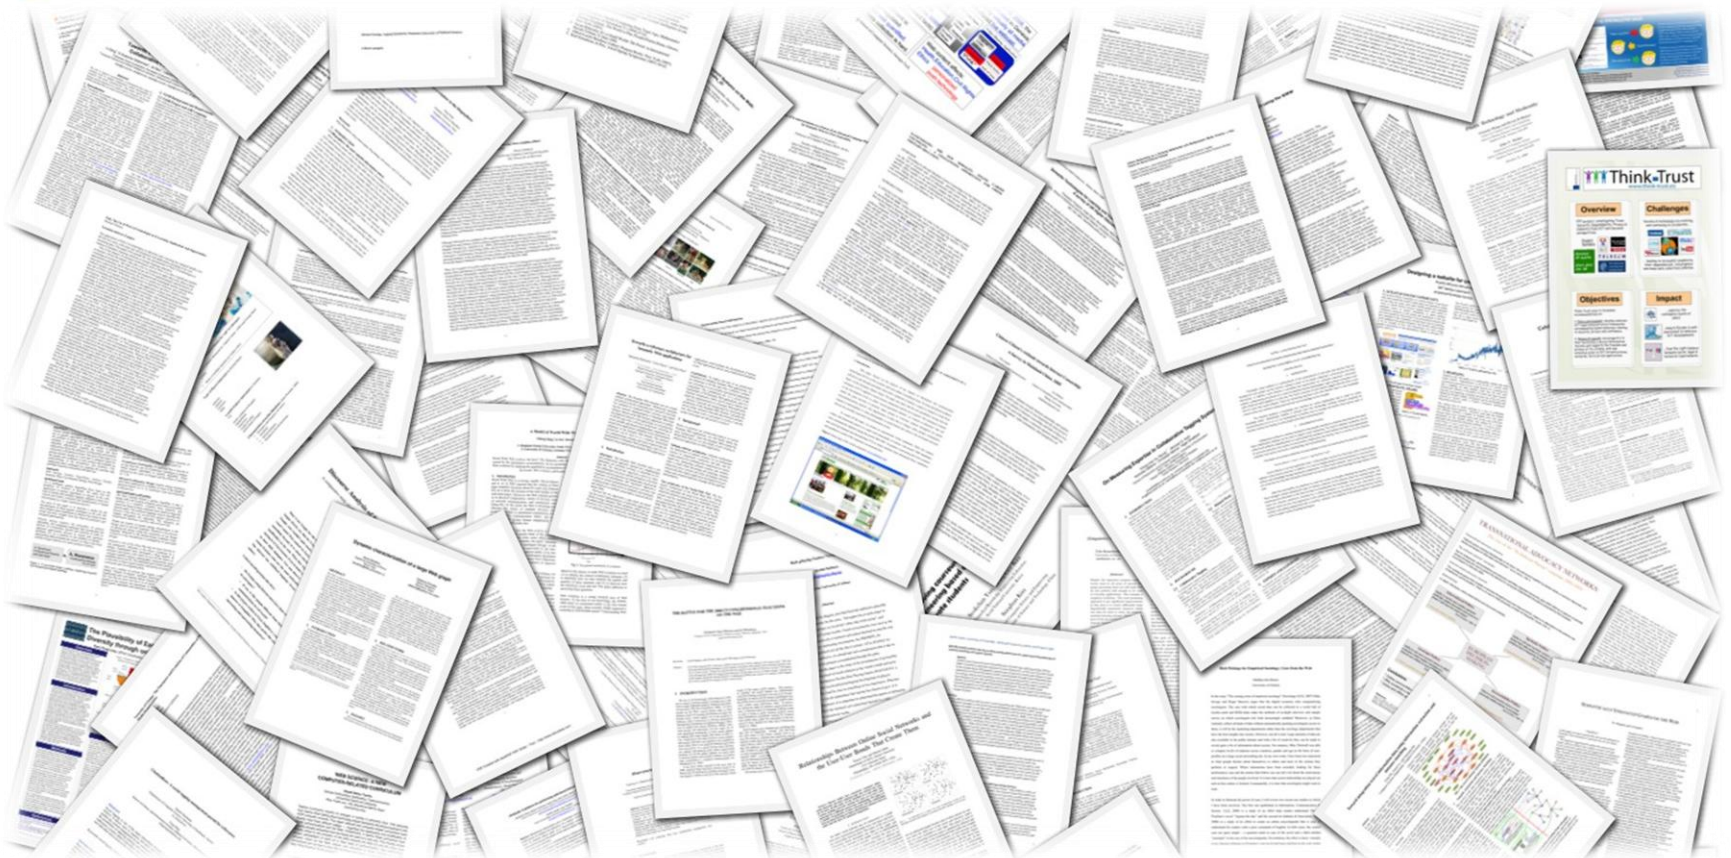

Evolution of Open Access in Portugal

- The first initiative related with Open Access journals was the creation of the Portuguese section of Projecto Scielo in March 2005

- In November 2006, CRUP (Portuguese Rectors Council) issued a Declaration on Open Access, during the 2nd Open Access Conference

- Following its Declaration CRUP established a Working Group on Open Access in January 2007. In the following months several Portuguese Universities established their institutional repositories.

Evolution of Open Access in Portugal

- Following some previous initiatives, in March 2008, UMIC contacted FCCN and UMinho to develop a project for the creation of a "meta-repository" (aggregator) and a service for hosting new repositories.

- That project was named RCAAP (Repositório Científico de Acesso Aberto de Portugal) and started in July 2008.

Open Access Journals

Open Access Journals

- Portuguese section of Scielo, Scielo Portugal, includes 29 Open Access journals from Portuguese publishers;

- The number of Portuguese journals in Directory of Open Access Journals (DOAJ) has been growing.

- Currently, 45 Portuguese journals are included in DOAJ.

	2002	2003	2004	2005	2006	2007	2008	2009	2010
Portugal	**Total DOAJ by year**								
	0	1	2	2	10	16	25	39	45
	New journals added to DOAJ by year								
	0	1	1	0	8	6	9	14	7

- In 2010 FCCN joined SCOAP3 initiative

Open Access Repositories

RCAAP Project

Goals
- Promote visibility and accessibility to the Portuguese scientific output
- Improve access to information about national scientific output
- Integrate Portugal into international Initiatives

Governance
- UMIC – Knowledge Society Agency (Political support and funding)
- POSC (Funding agency)
- FCCN (General and Infrastructures)
- UMinho (Scientific and Technical)

Services
- RCAAP **Portal** and **validator**
- SARI – IR's in *SaaS* regime
- Communication, awareness, training
- Advocacy and Networking

Services - RCAAP portal

Flavour of Arc *Software*

Início > Conferência sobre Acesso Livre > Conferência Luso-Brasileira sobre Acesso Livre

Universidade do Minho

Novembro 25, 2010 – Novembro 26, 2010

Na sequência do Memorando de Entendimento assinado entre os Ministros da Ciência e Tecnologia de Portugal e do Brasil em Outubro de 2009, e dando continuidade às Conferências sobre o Acesso Livre ao Conhecimento, organizadas pela Universidade do Minho em 2005, 2006, 2008 e 2009 (as duas últimas integradas no projecto Repositório Científico de Acesso Aberto de Portugal), vai realizar-se nos dias 25 e 26 de Novembro, na Universidade do Minho, em Braga, Portugal, a 1ª Conferência Luso-Brasileira de Acesso Livre.

A conferência pretende reunir as comunidades portuguesas e brasileiras que desenvolvem actividades, nomeadamente de investigação, de desenvolvimento, de gestão de serviços e de definição de políticas, relacionadas com o acesso livre ao conhecimento, através de repositórios e de revistas de acesso livre.
