of Structures**

Transferring Research into Practice

Proceedings of the 1st Canadian Conference
on Effective Design of Structures, CCEDS-1

McMaster University
Hamilton, Ontario, Canada
July 10-13, 2005

Edited by
Samir E. Chidiac
McMaster University Centre for Effective Design of Structures
Department of Civil Engineering

IMPORTANT NOTICE

These proceedings are derived from contributed content that was prepared using a variety of computer software and operating systems. While considerable care was taken to ensure the accurate processing and assembly of this content, it is possible that errors may have been introduced during processing and assembly. We regret any inconvenience that these errors may cause; however, we do not warrant the reliability of these proceedings. We also do not warrant or endorse the technical content of the papers and the opinions expressed by the authors of these papers.

Proceedings of the 1st Canadian Conference on Effective Design of Structures – Transferring Research into Practice

ISBN-number: 0-9738035-0-9 (Hardcopy)
 0-9738035-1-7 (CD Version)

Publisher: Centre for Effective Design of Structures

Table of Contents

Foreword	i
Background on the Centre for Effective Design of Structures (CEDS)	i
Conference Committees and Secretariat	ii
Keynote Addresses	
Selective Rehabilitation to Enhance Seismic Performance of Masonry Buildings <i>D.P. Abrams</i>	1
Seismic Rehabilitation of Nonductile Structures <i>M. Saatcioglu</i>	13
Seismic Retrofit of Steel Structure <i>M. Bruneau</i>	49
A Framework for Durability Design of Infrastructure <i>S. Mirza</i>	67
Focus Area 1: Analysis, Investigation and Remediation of Structures	
Design and Remediation of Overhang Drip Edges <i>R.H. Fletcher</i>	105
Diagnosis of Premature Defects and Deficiencies Associated with Building Process Oversights <i>A.G. Kerali</i>	117
A Simplified Procedure to Predict the Force-Displacement Behavior of Concrete Coupling Beams <i>R.A. Hindi and M.A. Hassan</i>	127
Moment Resistance of Laterally Unsupported Steel I-beams: A Proposed Equation for LRFD Approach <i>E.Y. Sayed-Ahmed and R.E. Loov</i>	137
Rectangular Stress Block for High-Strength Concrete - A Comparative Study <i>T. Ozbakkaloglu and M. Saatcioglu</i>	147
Floor Response Spectra for Reinforced Concrete Frame Buildings in Canada <i>S. Foo, N. Naumoski, T. Ozbakkaloglu and M. Saatcioglu</i>	157
Modelling the Effects of Variations in pH on the Free Chloride Concentration in Concrete <i>O.B. Isgor and A.G. Razaqpur</i>	167
Design of Reinforced Concrete Elements for Durability against Corrosion <i>C. Ji, S. Jefremczuk and M.S. Mirza</i>	177
Finite Element Analysis of Corrosion-Induced Cracking, Spalling and Delamination of RC Bridge Decks <i>K. Zhou, B. Martín-Pérez and Z. Lounis</i>	187
A Model for Confinement by means of Fiber Reinforced Polymers <i>E. Vintzileou</i>	197

Development of a Numerical Tool to Improve the Design of Transmission Towers by Accounting for Downburst Loads	207
<i>A.Y. Shehata and A.A. El Damatty</i>	
Effective Shear Design of Large, Lightly Reinforced Concrete Beams and One-Way Slabs	217
<i>E.G. Sherwood, E.C. Bentz and M.P. Collins</i>	
A Preliminary Study of a Tuned Liquid Damper with Smart Screens	227
<i>M. Casson and M. Tait</i>	
Effective Design of Stiffeners on Industrial Ducts	237
<i>J.D. Udall, B. Halabieh, S.E. Chidiac</i>	
3-D Nonlinear Finite Element Modeling of Cable-stayed Bridge	247
<i>M.S. Cheung, K.S. Chan and C.Y. Yang</i>	

Focus Area 2: Masonry Materials and Building Envelope

Feasibility of Using Recycled Fine Aggregates in Concrete Masonry Blocks	261
<i>C.S. Poon and D. Chan</i>	
The Use of Bearing Wedges to Eliminate the Influence of Construction Gaps in Steel Frames Infilled with CASIEL Walls	271
<i>B.M. Ng'andu, A.T. Vermeltfoort, and D.R.W. Martens</i>	
Stabilized Building Blocks incorporating Volcanic Ash and Finely Ground Natural Lime	281
<i>K. M. A. Hossain and M. Lachemi</i>	
Experimental evaluation of shear and compression strength of masonry wall before and after reinforcement: deep repointing	293
<i>L. Binda, A. Borri, M. Corradi and C. Tedeschi</i>	
Shear-Compression Interaction in Composite URM-FRP Walls	305
<i>A.A. Hamid, W.W. El-Dakhakhni, Z.H.R. Hakam and M. Elgaaly</i>	
Effects of the Addition of Waste Glass on the Compressive Strength of Fired Clay Brick	319
<i>L.M. Federico and S.E. Chidiac</i>	
Freeze-thaw Durability of Concrete Masonry Products	329
<i>H. Zibara and S.E. Chidiac</i>	
Development of a Finite Element Program for Three-Dimensional Nonlinear Analysis of Reinforced Masonry Buildings	341
<i>A.A. El Damatty, A.A. Hamid and R.G Drysdale</i>	
The Current Problem Concerning Energy Saving in Buildings and Houses: Analyses, Solutions and a Fast Way for Transferring Research into Practice	351
<i>E. Litovsky, J. Mar, and J. Kleiman</i>	
Further Validation of The Inverse Method for Predicting Air Flow in Buildings	361
<i>R.C. Richman and K.D. Pressnail</i>	
Assessing Sustainability in the Construction Industry	371
<i>C.A. Wall, T.R. Harris, P. Couture, A. St. Michel</i>	

Focus Area 3: Seismic Design and Retrofit of Structures

- Reliability of the Strain Compatibility-Based Model for Estimating the Gain in Flexural Strength of CFRP-Retrofitted Girders 381
E.Y. Sayed-Ahmed, A.H. Riad and N.G. Shrive
- A Parametric Study on the Seismic Behavior of Liquid Containing Structures Based on ACI 350 Code 391
R. Kianoush, A. Hafez, and H. Mirzabozorg
- Application of a Damage Model to the Study of the Long Term Behaviour of Ancient Towers 401
A. Anzani, L. Binda and A. Taliercio
- Design of FRP Reinforced Concrete Structures for Seismic Effects 413
M. K. Sharbatdar and M. Saatcioglu
- Recommendation of Response Modification Factor (R) for Concrete Shaft Staging Elevated Tanks 423
M. Masoudi and M. Ghafory-Ashtiany
- Recommendation of Response Modification Factor (R) for Concrete Frame Staging Elevated Tanks 433
M. Masoudi and M. Ghafory-Ashtiany
- Dynamic Behaviour of the Confederation Bridge due to Seismic Loads 443
L. Lin, N. Naumoski, S. Foo and M. Saatcioglu
- Seismic Vulnerability Overview of Historical Masonry Churches in Europe 453
P.B. Lourenço and D.V. Oliveira
- Determination of Design Loads for the Seismic Retrofit of the Victoria Memorial Museum 463
T.N. Stevens and D.J. Carson and J. Humar
- Explicit Finite Element Approach for Effective Collapse Simulation of Steel Box Bridge Piers under Multi-directional Earthquake Loading 473
H. H. Mohammed
- Upgrading T-Beams Subjected to Combined Torsion and Shear Using CFRP 483
A. Deifalla and A. Ghobarah

Focus Area 4: New and Under-Utilized Materials

- System Design of Modern Light Wood Frame Buildings 493
Y. H. Chui and I. Smith
- New accelerated test method for compressed earth blocks 503
A.G. Kerali
- The Influence of Contaminants in Recycled Concrete Aggregate on the Fresh and Hardened Properties of Concrete 513
C.S. Poon and D. Chan
- Effective Utilization of Structural Timber using the Novel Tube Connection 523
A.J.M. Leijten
- The Influence of Self-Cementing Properties of Fine Recycled Concrete Aggregates on the Characteristics of Road Sub-base Materials 533
C.S. Poon, X. C. Qiao and D. Chan

Cold-Formed Steel Joists with Reinforced Web Openings <i>M. Y. Ng, S. R. Fox, and K.S. Sivakumaran</i>	543
Hydration of the Condensed Silica Fume in Presence of Lime and Cements <i>M.N Oudjit, K. Arroudj and A. Bali</i>	553
Lightweight Concrete with Pumice Aggregate: Mix Design and Fire Resistance <i>K. M. A. Hossain and M. Lachemi</i>	563
Development of Ultra-Lightweight Concrete and Concrete Products <i>C. Shi</i>	575
Focus Area 5: Precast Concrete Drainage Products	
Research Suggests Conservative Design of Concrete Box Culverts <i>P. Smeltzer and E. Bentz</i>	585
Field Performance of a Concrete Pipe Culvert Installed Using Standard Installations <i>P. Smeltzer and L. Daigle</i>	591
Current Issues with Dry Cast Concrete Containing Blast Furnace Slag <i>S.E.Chidiac, D.K.Panesar, P.Smeltzer and E.Kling</i>	603
Indirect Design Method – Marston Spangler Method of Estimating Loads on Buried Pipe <i>P. Smeltzer</i>	613
Detection of Depth of Surface-Breaking Cracks in Concrete Pipes <i>Y. Yang, G. Cascante and M. A. Polak</i>	623
Effect of Metal Oxide Coating on Generation of Sulfide in Concrete Sewer Pipes <i>E. Hewayde, G. Nakhla, and E. Allouche</i>	635
